

# ■ Prompt Engineering Portfolio

## Levels 11 – 15 (with Feedback Summary)

This document contains portfolio-ready prompts crafted between Levels 11 and 15, demonstrating advanced skills in AI startup strategy, JSON design, compliance reasoning, and investor-ready prompt writing. Each level includes feedback and scores.

## Level 11

### **Prompt:**

Act as a business consultant and a risk analyst. Suggest 3 business models for 2025. For each model include: Name, Reasoning (2 sentence CoT), InitialInvestmentUSD, Expected Income, RiskLevel logic (High >8000, Medium 3000–8000, Low <3000). Present in JSON array. Add 2–3 lines outside JSON making decision easier. Tone: professional and concise.

### **Feedback:**

Strong structure with clear risk logic. Well-formatted JSON request. Could improve by adding market potential reasoning. Score: 8.2/10.

## Level 12

### **Prompt:**

Act as an AI startup consultant and financial analyst. Suggest 4 AI startup ideas for 2025. For each: Name, Reasoning (3 sentence CoT), InitialInvestmentUSD, ProfitUSD, ROI %, RiskLevel logic (High >10000, Medium 5000–10000, Low <5000). Mention market potential. Present in JSON array. Add 2–3 lines outside JSON with safe recommendation. Tone: expert, concise.

### **Feedback:**

Great use of ROI and structured reasoning. Included market potential clearly. JSON logic correct. Needed slightly more compliance/real-world risk factor. Score: 8.8/10.

## Level 13

### **Prompt:**

Act as an AI startup consultant, marketing strategist, and investor advisor. Identify 3 startup ideas for 2025. For each: Name, Reasoning (2–3 sentence CoT), InitialInvestmentUSD, ProfitUSD, ROI, RiskLevel logic (High >15000, Medium 7000–15000, Low <7000), GoToMarketStrategy (1 sentence), TargetCustomers, Freelancer/Healthcare fit. Present as JSON. Add 2–3 lines outside JSON as startup pitch. Tone: professional.

### **Feedback:**

Excellent prompt. Combined business strategy + GTM + investor view. Well-defined structure. Could add compliance factor for realism. Score: 9.0/10.

## Level 14

### **Prompt:**

Skipped (skills merged into Level 15).

### **Feedback:**

You skipped Level 14 but merged compliance + advanced JSON logic into Level 15. Smart move.

No penalty since coverage was preserved.

## Level 15

### **Prompt:**

Act as an AI Startup Consultant, Financial Analyst, Marketing Strategist, and Risk & Compliance Advisor. Identify 5 AI-powered startup ideas for 2025. For each: Name, Reasoning (4–5 sentences CoT), InitialInvestmentUSD, ExpectedMonthlyProfitUSD, ROI, RiskLevel (High >20000, Medium 10000–20000, Low <10000), ComplianceChallenge, GoToMarketStrategy (2 pitch-style sentences), TargetCustomers, InnovationFactor. Present all in JSON array named AIStartupPortfolio2025. Add 4–5 line Final Recommendation outside JSON. Tone: investor-ready, concise, professional.

### **Feedback:**

Outstanding! Full investor-grade prompt. Added compliance, innovation, GTM strategy. Clean JSON naming. Portfolio ready and GitHub publishable. Score: 9.6/10.

■ Feedback Summary (Levels 11–15)

Level	Score/Feedback Summary
Level 11	8.2/10
Level 12	8.8/10
Level 13	9.0/10
Level 14	Skipped (merged into 15)
Level 15	9.6/10

■ Overall Progress: You are moving from intermediate to advanced level in prompt engineering. By Level 15, your prompts are portfolio-ready and show professional, investor-grade structure. Keep scaling up — by Level 20, your prompts will be world-class and fully GitHub-publishable.
